

Welcome Aboard M/S Sjöbris and M/S Sjögull

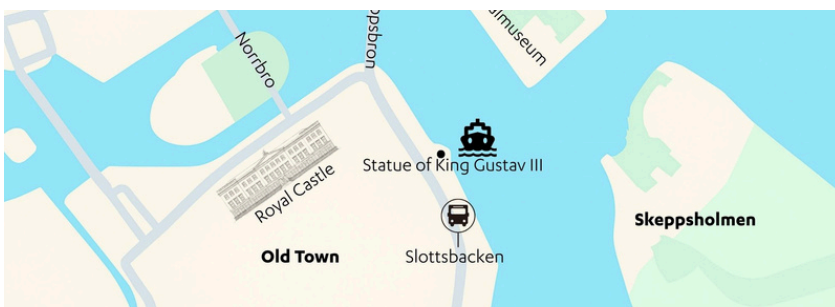

Well suited for larger groups requiring rapid
transport to destinations throughout the archipelago

History & Information – M/S Sjöbris and M/S Sjögull

The sister vessels M/S Sjöbris and M/S Sjögull were built between 1983 and 1987 as additions to the growing archipelago traffic. In 2007, they underwent an extensive refurbishment, featuring new interiors, modern technology, and an upper-deck lounge. With their bright, comfortable lounges and high cruising speed, they are ideally suited for voyages far out into the Stockholm archipelago. M/S Sjöbris is also one of the few larger archipelago vessels certified to reach destinations such as Röder, Söderarm, and Huvudskär.

With extensive experience in voyages to the outer archipelago and historic lighthouse sites, Blidösundsbolaget offers memorable experiences that blend nature and history. Thanks to their high speed, the vessels are ideal for both excursions and efficient, comfortable transport.
